Kortüm, Gustav and Braun, Walter.
PHOTOCHEMICAL REACTIONS OF ANTHRACENE IN THE ADSORBED STATE. [1960] 15p. 13 refs.
Order from SLA mi$2.40, ph$3.30 61-10201

Trans. of [Justus Liebigs] Annalen der Chemie (West Germany) 1960, v. 632 [no. 1/3] p. 104-115.

The oxides and salts used as adsorbents are shown to exert a strong catalytic effect on the reaction

$$\text{Anthracene} \xrightarrow[\text{Adsorb.}]{h\nu,\ O_2} \text{Anthraquinone}$$

The intermediate endoperoxide state which is generally postulated in the case of oxidation in solution probably does not occur in reactions which take place at the surface of powders, as shown by analogous measurements with 9, 10-diphenylanthracene. With aluminum oxide and silica gel as adsorbents, 1, 4-dihydroxy-anthraquinone (Quinizarine) is formed from anthracene or anthraquinone in continuation of the above reaction. In this case the catalytic influence of the adsorbents (Chemistry--Physical, TT, v. 5, no. 4) (over)
